(54) Title: PHENANTHROLINE DERIVATIVE AND LIGHT EMITTING ELEMENT AND LIGHT EMITTING DEVICE US-
ING THE SAME

(2)

(57) Abstract: It is an object of the present invention to
provide a novel material that can be used for an electron
injecting material. In addition, it is an object of the present
invention to provide a light-emitting element that is able
to broaden choices for an electrode material. An aspect of
the present invention is an electron injecting material repre-
sented by a general formula (2). In the general formula (2),
R6 is selected from the group consisting of an alkyl group
having 1 to 4 carbon atoms, an alkenyl group having 1 to
4 carbon atoms, and an aryl group having 6 to 10 carbon

atoms, where the alkenyl group and the aryl group may have a substituent.
